

**VEDIC RESEARCH & INNOVATIONS BRINGS YOU THE LINDA GOODMAN'S PURPLE POSITIVE ENERGY PLATES FOR THE FIRST TIME IN INDIA. USE THE NATURAL OPTIONS TO EASE THE PAINS, STRESS, FATIGUE, INSOMNIA, DEPRESSION & SUICIDAL TENDENCIES.**

**HIGHLY BENEFICIAL TO PEOPLE WITH PAIN, STRESS, FATIGUE, INSOMNIA DEPRESSION & COMPUTER RELATED INJURIES.**

**WE SELL THE GENUINE, AUTHENTIC PLATES THAT LINDA GOODMAN REFERS TO IN " STAR SIGNS !!!**

**Do u often have unexplainable headaches? Do u suffer from insomnia or sleep disorders?**

**Do u feel fatigued & have little energy at the end of the day. Are u often chronically ill or prone to diseases & depression/Or do u suffer from allergies/AND most importantly---**

**Yes, & the symptoms aggravate DURING EXAMINATIONS, INTERVIEWS & WORK PRESSURE.**

**Do u use computer, mobile or other ELECTRO MAGNETIC RADIATION producing equipments, and despite the attendance with the physician, the symptoms return or become even stronger.**

The answers to these queries is [Linda Goodman's] Purple Positive Energy Plates. The brain behind these plates was Nikola Tesla, the famous American scientist who is also associated with Cosmic Rays, Radar, Cryogenic engineering & AC current. In 1943 the American Supreme Court ruled out the earlier findings in the name of Marconi & ruled out in Nikola Tesla favour.

The plates were ultimately developed by his scientist friend Ralph Bergstresser.

The atoms & electrons of the aluminium have been altered by man made procedures so that the plates are in resonance, or in tune with or in tandem with the basic Life Force Energy, which we call Pran in India. They function as transreceivers, creating a field of Positive Energy around them that will penetrate any material substance by osmosis.

We know that each material object and each human being vibrates to an Individual Frequency of Angstrom units (light waves) per second. This is the Life Force Energy responsible for Universal Harmony and synchronicity . . . the forgotten rainbows and forgotten melodies creating the Oneness of the Universe established by Cleve Backster's Primary Cell perception discoveries. In India this Life Force Energy is called Prana, but whatever it's called you can not live without it, and at present you're using only a fraction of its power

**Ideal for people who are prone to depression because of work or studies Pressure .  
People who spend more than 3 hours on computers & are thus susceptible  
to pain, stress, fatigue & other computer related injuries.**

**A boon for PREGNANT MOTHER'S - it stops nausea & vomiting.**

**People with irregular sleeping hours for eg BPO's executives.**

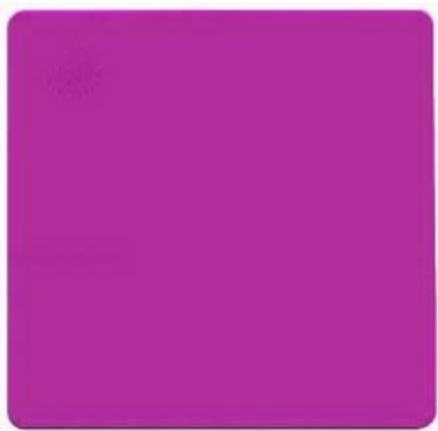

Use as a First Aid to ease a sudden toothache, etc, at night.

The large plates are approximately seven times more powerful than the small plates ... but don't underestimate the small plates.

Because of its size, the large plate carries more energy...  
but, don't underestimate the power of the smaller ones !

This large one is excellent for the refrigerator shelf....under a bag of groceries coming in the house (for a few minutes)...under a gallon of water to drink or feed plants...plus many other uses.

12" 12"

1. Wear the small plate in pocket for more energy. If no pockets, women carry the plates in their purse. (No body contact necessary.)

2. Place a glass of water on the small plate for just three minutes and taste the difference. The water is energized by the life force energy. Many travelers use the small plate to prevent stomach upset caused by drinking water in other countries.

Place a glass of water on the small plate for just three minutes and taste the difference. The water is energized by the life force energy. Many travelers use the small plate to prevent stomach upset caused by drinking water in other countries

Place a large plate beneath you computer monitor to counter the effects of EMR, reduce fatigue, and work in a three feet bubble of positive energy. (Also refer to the details on the [Computer Guard](#))

3. Place purchased bags of food on the large plate for approximately 15 minutes. This induces the "life force energy".
4. Place large plate in refrigerator (center shelf). Food will last much longer (except for fresh meat and fish), and thermostat may have to be readjusted if food freezes.
5. Place plate under sick house plants.
6. Place a large plate beneath you computer monitor to counter the effects of EMR, reduce fatigue, and work in a three feet bubble of positive energy. (Also refer to the details on the Computer Guard.)
7. Place small plate in dog or cat bed, or under food dish.
8. To energize crystals or decomposed granite (or quartz sand), place material on the plate for 12 hours. Scatter quartz sand or granite onto indoor or outdoor trees or plants to enhance growth.
9. Place 1 gallon of water on large plate and use to water plants (12 hours or overnight).
10. Use the plate on injured area of any living thing.
11. For pregnant mothers , it is a boon. It stops Nausea & Vomiting. Place it between navel & breast bone.

**12 People who are prone to work pressures, whether studies or job related, it reinforces the Life Force Energy & keeps them away from PAIN,STRESS,FATIGUE & SUICIDAL TENDENCIES**

**13. It protects the users from all ELECTRO MAGNETIC RADIATIONS**

14.Place beneath your flower vase-The flowers will last much longer

15. Use the photographic method[ LINDA GOODMAN] to WIN YOU LOVED & DEAR ONES.

16. BPO EXECUTIVES, who lead an irregular sleeping pattern---Sleep with the plate below your Pillow & even a four hour sleep will energise you as much as if you had an 8 hour sleep.

#### **Purple Plate Cat and Dog Collars**

Purple Disk Safety Cat Collar – Rs 299.00

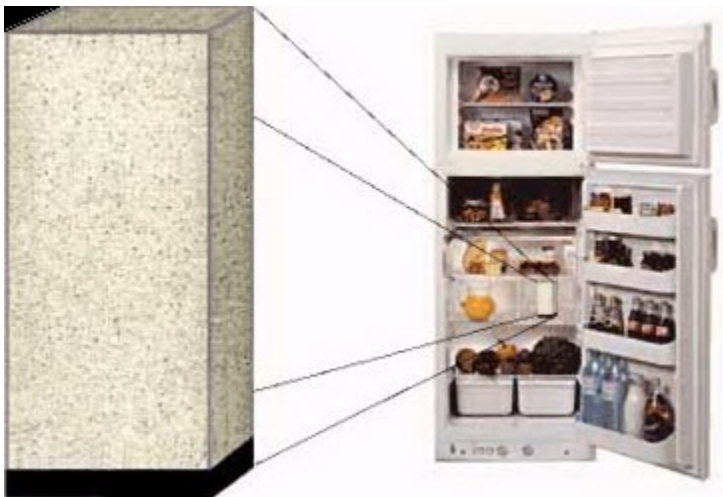

Purple Disk Dog Collar –Rs 299.00

#### **Fridge Freshener/Computer Guard: Rs 1350.00**

Place the Fridge Freshener on a shelf in the center area of your refrigerator. Should there be any odors, they will gradually disappear but this will not happen instantly. Several days may be required.

In the majority of refrigerators, the temperature will drop by several degrees after a period of time. If this happens, readjust the thermostat temperature so that the vegetables and others foods do not freeze. Less electrical power is required to maintain the proper temperature.

Energy is continuously emitted from these units in which the atoms of the crystal materials have been reoriented into what might be considered a "single crystal" They have zero resistance with higher energies and create what might be considered a "bubble" of positive energy. This field of energy has the ability to slow deterioration of all types of food without affecting the taste or flavor. You can save hundreds of dollars a year on food costs by eliminating spoilage and waste. Fridge Fresheners are non-toxic, and contain no chemicals.

You can save hundreds of dollars a year on food costs by eliminating spoilage and waste, and in most cases, a savings in electricity. Sounds impossible, but users report that it actually lowers the refrigerator temperature. They say food remains fresh two to four times longer than usual. Saves on food costs by reducing spoilage, and cuts electricity costs as well. Nontoxic, no chemicals, and units first manufactured 20 years ago are still functioning as new.

**The inventor, Ralph Bergstresser, said that in 1978 the Canadian Government ran tests on this device: "They found that by placing the 'Fridge Freshener' in a home refrigerator, a saving of \$4.00 per month on electrical consumption resulted from its use," he said. "This was an added feature that was never anticipated. Most thermostats must be raised on home refrigerators, otherwise the food will freeze and, of course, this saves energy."**

The 12" by 12" square) is placed on the center shelf of a home refrigerator. Should there be any odors, they will gradually disappear, but do not expect this to happen instantly - several days may be required.

**Amazingly, the Canadian government tested this device almost 20 years ago, and found that the** fridge freshener has the innate ability to reduce the internal temperature of the refrigerator in which the energy cube was used. This resulted in a savings of \$4.00 per month in electrical consumption during its time of use. That was nearly twenty years ago. Imagine the reduction in cost today. This device will pay for itself at today's savings in as little as 6 months. Most thermostats in the refrigerator

must be set to a lower number to prevent freezing of food!

**Not only does this unit reduce electric bills, it also deodorizes.**

Acting like an antenna transceiver to the life giving force of the universe, the energy cube then radiates an energy field around itself that penetrates any material in its vicinity. The contents of the refrigerator then receive this life giving force in similar fashion as when "growing on the vine".

Food will remain fresh for two to four times longer than normal except for meat and fish. It also removes odors. It lowers energy costs by lowering the temperature inside the refrigerator, inducing the need to turn up the thermostat. Just like the Purple Plates the Fridge Freshener is inexhaustible. In the majority of refrigerators, the temperature will drop several degrees after a period of time. If this happens, readjust the thermostat temperature control so that your foods do not freeze. Less electrical power is required to maintain the proper temperature (2 to 4 degrees Celsius.)

The efficiency of these units increases with time and you will gradually notice that foods remain fresh and useable longer than normal. This will vary depending on how old the product was before it was placed in your refrigerator. Uncooked meats, fish and fowl remain fresh only slightly longer than normal, but after they have been cooked, they remain fresh and useable for much longer periods of time.

Energy is continuously emitted from these units in which the atoms of the crystal materials have been reoriented into what might be considered a "single crystal". They have zero resistance with higher energies and create what might be considered a "bubble" of positive energy. This field of energy has the ability to slow deterioration of all types of food without affecting the taste or flavor.

**As a Computer Guard: Rs 1350.00**

Many users place the Fridge Freshener next to their computer monitors. After a few days a bubble of positive energy is formed around the work station, eliminating the affects of EMR from the equipment and wrapping the operator in the life force energy. Many report reduced stress and fatigue after using this amazing product as their 'Computer Guard'.

With the technological development of our civilization humans are today exposed to electrical & magnetic fields & Radiations. It's an accepted scientific fact that the Electromagnetic Radiation Of computers, microwaves, mobiles etc is harmful to human health in a serious manner. All Computer Related Injuries, like fatigue, sleeping & postural disorders etc can be protected By using these guards

Just by carrying pp in ur pocket will increase ur personal energy level, ease the pain & protect u againstemrin the enviroment& from emr producing equipments  
Simply place the cg beneath your monitor[as shown in the picture] After a few days a bubble of Positive energy is formed around the workstation, eliminating the affects of emr from the equipment & wrapping the operator in the life force energy.You will experience reduced stress & fatigue after using this amazing product known as COMPUTER GUARD.

Mobile Guard-Rs 299.00

**Recent Swedish epidemiological studies confirm that after 2000 hours of cellular phone exposure or a latency period of about 10 years, brain cancer risks rises by 240 percent**

**Human DNA hears the different emr frequencies loud & Clear, reacting like a human ear** would do to high volume country music. Irradiated cells struggle to protect themselves against this destructive dissonance by hardening their membranes. They cease to receive nourishment, stop releasing toxins, die prematurely & spill micronuclei fragments into a sort of "tunor bank account. **A 4 year study conducted by the EU by 12 research groups in 7 European countries found that radiation from cell phones harm body cell & damage DNA**

The electrical smog, that increased several times after the introductions of mobile phones, computers,TV's, high frequency lines & the wireless technology causes the numerous diseases such as Cancer,leukemia,tumor,hair loss,abortion,depression & even suicidal tendencies.

## Nikola Tesla

**Nikola Tesla was born at midnight on July 9, 1856 in Smiljan, Lika, Croatia. He was known to say, "I am a Serb but my fatherland is Croatia." At the age of twenty-six while walking with a friend in a park in Budapest, Nikola recalled, "the idea occurred to me like a flash of lightning and in a second the truth revealed itself. With a stick I drew in the sand the diagrams...". He was talking about an alternating current (AC) induction motor. Nikola patented his motor in 1893 and used it to light the World Columbian Exposition in Chicago in the same year. Then in 1896 the world's first hydroelectric power was sent from Niagara Falls to light the city of Buffalo. Nikola Tesla, through George Westinghouse, had laid the foundations of the power system used around the world today.**

Many scientists and individuals acknowledge Tesla's foresightedness and accredit him as being the originator of many of today's inventions. The wording to describe Tesla's 1891 carbon button lamp (the "brush"), with minimal word change, serves well as a description of the million-magnification point electron microscope developed by Vladimir R. Zworykin in 1939. The "brush" has also been related to the cyclotron and the atom smasher.

Tesla described a vacuum bulb, considered to be the forerunner of the radio vacuum tube. He talked about visible and invisible light and described blurred photographic plates in his laboratory, considered to be the earliest reference to X-rays. And did Nikola venture into plasma physics when he created a flame and described it as "burning without consuming material or even a chemical reaction"? Fifty years before the development of the fluorescent lamp, Nikola built phosphor-coated globes and illuminated his gas-filled tubes, which he had twisted into names. **The disputed credit for the invention of the radio was settled in 1943 when the U.S. Supreme Court reversed an initial finding in Marconi's favor to rule that Tesla had anticipated all other contenders with his fundamental radio patents.**

The list of credits given to Nikola Tesla is large indeed. He has been associated with cosmic rays, radar, diathermy, the high-frequency furnace, wave-guide for microwave transmission, space navigation code, cryogenic engineering, electrotherapeutics, energy transmission to satellites, principles of solid state transistor technology, and the reciprocating dynamo.

Tesla's genius with electricity received further stimulation through his interest in resonance. The ubiquitous Tesla Coil is evidence of the synergy of electricity and vibrations. With a power cord from an insulated handle at one end and primary and secondary coils tuned to resonate at the other end, the Tesla Coil, when plugged in, begins to vibrate and hum. The small Tesla Coil generates high voltages and high frequencies and is used in one form or another in every radio and television set and can be found in every university science laboratory: used to detect leaks in vacuum apparatus.

It has been said that resonance is a manner in which nature works. It covers all aspects of science from electricity to nuclear fusion. Nothing exists in the Universe that does not have vibration. Nikola knew that vibration is the rapid back-and-forth motion of an object, which creates waves. He also knew that resonance is the effect of these waves on another object when, in 1898, he made an oscillator no larger than a fist and attached it to a steel link two feet long and two inches thick.

In his sunset years, Tesla believed that all matter came from a primary substance, the luminiferous ether, which filled all space.

Nikola once said, "...I continually experience an inexpressible satisfaction from the knowledge that my poly phase system is used throughout the world to lighten the burden of mankind and increase comfort."

## **Purple Plates for Purple Leprechauns**

We've already learned that each material object and each human being vibrates to an individual frequency of angstrom units (light waves) per second. This is the life force energy responsible for universal harmony and synchronicity . . . the forgotten rainbows and forgotten melodies creating the Oneness of the Universe established by Cleve Backster's Primary Cell perception discoveries. **In India this life force energy is called Prana, but whatever it's called you could not live without it, and at present you're using only a fraction of its power.**

Their atomic structure has been altered, so that they are in resonance with a high-frequency vibration of the life energy force, in a complex way, connected with the known energy of negative ions. The "purple energy plates" (my own personal name for them) possess a field of energy capable of penetrating any living thing - plant, animal or human.

**The life force energy, or Prana, can be measured in several ways. One of them is through radionic equipment. Using this measurement, the energy level of an individual man or woman not yet fully illuminated might register, say, 20 on the scale. When this person is handed a purple plate the reading will instantly increase to 90 or 95. It won't remain at that level, but continual use of the plate will gradually bring the person's energy to 100 permanently. Enlightenment. And higher than 100, since the life force energy cannot be completely measured by any device presently known. And so, the use of this New Age "magic" will eventually raise your frequency rate of angstrom units per second**

Precisely how the plates work should not be of as much concern to you as what they can do for you. There are so many mini-miracles the plates accomplish (some of which you'll discover for yourself) it's difficult to detail all of them. Here are just a few.

First and foremost, the plates will slowly but very surely raise the vibratory frequency of those who use them, and that's of prime importance. They will reduce the negative vibrations in food, water, other liquids and tobacco. Many people who own them place their food on the larger size plates, while it's still in the shopping bag from the market, for about fifteen minutes. Travelers often find that the water in a foreign country makes them ill, but it won't if the water is energized on a purple plate for two or three minutes. Cigarettes become milder after being placed on the plate for fifteen minutes or so, and pineapple, for instance, **will lose its sour taste and become sweet-tasting.**

**The magic I personally find to be the most helpful, involves pain. When a purple plate is placed on a burn or a cut or tied with a ribbon or cord on an**

ache or a pain anywhere in the body, healing is noticeably accelerated, and the pain either greatly lessens or disappears entirely with amazing swiftness, usually within five to ten minutes, seldom longer than twenty minutes. This is accomplished by the plate's energy in returning the injured cells or tissue to a normal vibration rate; thus the healing and disappearance of pain is due to the afflicted area being returned to the proper balance.

### **A BOON FOR PREGNANT MOTHERS**

One of the magics I've depended on numerous times is the energy plate's ability to remove the sensation of nausea almost instantly. Any time I feel severe nausea, for whatever reason, I rush to get a purple plate, lie down on the bed on my back and place the plate on my solar plexus. The large size plate usually works more quickly in this instance, but a small one also does the job, taking only a few minutes longer. Using the plate in this way causes all sensations of nausea to disappear within no longer than five minutes, usually within one to two minutes and sometimes in thirty seconds. I don't know what I would do without that reliable pain and nausea reliever being always available when I need it in a hurry .

Some of my friends sleep with the plate tucked into the pillow case (on the bottom side, not the head side) all night. They awake in the morning with more energy, and feel as if they've had a full eight hours' sleep, whether they have or not.

As for raising your vibratory frequency with the plates, some people will feel increased physical energy and less fatigue by tucking one in the pocket of a shirt or blouse for thirty minutes to an hour, twice a day. Every individual is different, and experimenting with the plates will quickly tell each person the most effective way to use them relative to his or her own personal response. ***I almost forgot a special message to plant lovers. Water your plants with water treated on a plate, and notice the difference in their growth. Also, place a purple plate under fresh flowers from a florist, and they'll last nearly twice as long before wilting.***

The plates have been in use by many people for more than fifteen years (written in 1988) - I've had my own for more than ten years - and they still function as effectively after that length of time. Once the structure of the atoms of the aluminum have been altered, they will remain in that condition probably indefinitely. The plates are not "charged"; they are simply altered to vibrate with life force energy of the Universe - what Nikola Tesla called "free energy."

### **ABOUT RALPH BERGSTRESSER**

Bergstresser carefully studied anything written about Nikola Tesla's experiments, and attended many lectures given by Tesla. At one point they were introduced, and quickly became friends due to like interest in free energy. Over the course of the next 20 years until Tesla's death they had numerous conversations on the process of tapping free energy. After Tesla's death Bergstresser was able to discover the secret of altering the aluminum in the Positive Energy Plates from clues and notations in Tesla's notebooks. Also instrumental in leading Bergstresser to the discovery of healing energy was an incident which took place while he was a guest of a maharaja in India some 50 years ago.

Wrote Bergstresser; "The maharaja had an 8 month old son that was very sick. I asked if he was going to get a doctor. He said 'no, we have sent a man to obtain some holy water from the Ganges River.' In 3 days, the man came back with one gallon of water. They fed the water to the sick child and...and like magic, the child was healed and back to normal. To me, a miracle is an inability to understand a scientific fact. How could the water cure the child? That was the problem. It was this incident that triggered my curious mind to find the answer and this led me into the present knowledge. "

He goes on to explain why the water of the Ganges purportedly has the power to heal. " For thousands of years the native population of India have used the water from the Ganges for healing. Gallon jugs of this water from the Ganges have been stored for over half a century at the University of Calcutta, and are still completely free of bacteria. What causes the water to have such fantastic healing powers? A tributary of water, that eventually finds its way into the Ganges River, originates and begins its long journey from high into the Himalayan Mountains. It is there, high in the mountains where the atmosphere is clear and clean, that nature begins the natural process of creating special water. This process starts when the mountain and its snow cover is bombarded by the higher energies of the Universe: known as cosmic energy. This bombardment by cosmic 4th dimensional energy alters the atomic and molecular structure of the rocks and granite that constitute these magnificent mountains, and in turn, changes the chemistry of the snow and water as it flows over them and down to the lowlands. This chemistry change is adding the Life Force Energy to the water. It is the Life Force Energy, which has now become an intricate part of the water, that produces the healing miracles of the Ganges River. The key to this phenomenon is now known and utilized to produce the energy plates and products."

Bergstresser, who was also the author of a handful of metaphysical books, died in 1998 at the age of 86.

Perhaps most curious to me in Linda Goodman's description of the plates were the paragraphs concerning the influencing of persons with the plates. Within the more than dozen pages pertaining to Purple Plates in her book, Goodman writes that the plates possess the power to influence a person through the use of a photograph placed face down on the surface. She uses the example of a friend's husband who was an alcoholic prone to negative behaviour, and who was badly in need of positivity. Soon after using the husband's photograph on the purple plate, he began a recovery which included sobriety and hopefulness. However, Goodman, as well as others, warn that leaving a photograph on the plate for any more than 15 minutes to a half hour at a time can cause nervousness or anxiety in some people. She also warns that attempting to influence a person in a negative fashion will not work.

## Joshua A Stone

In his book "Beyond Ascension" Joshua Stone refers to the plates: "One of the most extraordinary tools I have found to raise my overall energy and even my light quotient is the Positive Energy Plate. I am not one for gadgets. I have seen them all and I use almost none of them. The one exception I make is the use of the Purple Plate, which I am sure many of you have seen. **It is actually a free-energy plate. The Purple Plate not only cleared the food of all negative energy (.....), but also energized the food. Now I put all my food on it and continue to be amazed.**"

Stone also goes on to claim that no matter what your diet is, if you use the Positive Energy Plate it will guarantee that you will get the positive energy that you need. "...I don't own stock in the company, nor do I know the person who invented them. I am just very excited about all the ways this Positive Energy Plate can be used.!"

## Testimonials Testimonials Testimonials

**We welcome your testimonials concerning the plates, and offer a free product in exchange for your good news.**

Dear Karina,

I am writing to thank you for promoting such an amazing product! Recently I was being treated by a chiropractor 3-times a week for a sprained back.

Prior to receiving the purple plates I was experiencing chronic pain every day.

With the application of heat packs, adjustments, massage & walk-Fit orthoditics, I was slowly recovering.

I am happy to report that as a result of sleeping with the energy plates and necklace that today I am no longer being treated by the chiropractor! I am pain free & I can walk without the aide of the orthodicts.

My aunt Linda was recently diognosed with colon cancer, which required surgery. After I loaned her my plates she is healed from pain and home from the hospital in only 4 days.

However she refuses to return my necklace.

Thank you for offering an AMAZING product, it has saved so many lives around me.  
Ca'Brina Cooks  
Oceanside, Ca.

I wanted to share with you a way in which I have been using the purple plate discs lately. For brief periods of time, I place two on specific acupuncture points--one on the left side of the body, one on the right side. Sometimes it takes a bit of balancing to get them to stay put (for up to about 10 minutes at each spot). This has proved to have the effect of experiencing a mini-acupuncture session, it is quite powerful as an energy work session!

I find it's not necessary to place them on the points for long periods of time. Also one could get creative, placing them inside socks (for the kidney points by the inside ankle area, kidney 3 and kidney 5), or under a hat (on the crown of the head).  
Love those discs!

Aloha.....Diane M., Hawaii

Hi, I would love to add my own testimonial to your site: I have been using purple plates since 1991. My old ones continue to work just as well after 14 years. At the time I bought my first plate I was suffering from temporal lobe epilepsy and atrial fibrillation. Unfortunately I was only 16 at the time and went through a year of devastating symptoms before I was diagnosed. The day that the purple plate arrived in my mailbox I was very skeptical about whether or not it would have any effect, however, the very moment I held it up to my chest, the heart arrhythmia returned to normal. Thinking this was just a coincidence I tried it again and experienced the same

result. It proved equally effective at diminishing, and sometimes completely ending, my seizures. During the year I spent not knowing what was wrong with me, and receiving no help at that time from doctors, the purple plate was the only thing I had to relieve symptoms. In my own personal experience, the plate seems to work best on ailments that have some neurological origin, and with these it remains highly successful to this day.
